QUESTIONS TO DISCUSS

Questions to Discuss

How can we make the bioeconomy vibrant with the use of timber in construction?

where are the bottle necks for wooden construction?

what are solutions to these? (e.g. hybrid buildings, bioeconomy strategies and green circular economy, environmental standards)

More Questions

- -what is the relevance of case study results with regards to the construction sector in general? How significant are they? What can be learned from them?
- which aspects make each case relevant for the national bio economies?
- what are solutions to these? (e.g. hybrid buildings, bioeconomy strategies and green circular economy, environmental standards)
-

Thank you for your kind attention!
